

# Ai in finance

By : Vishwas Narayan

**DISCLAIMER**

# Who am I?

1. The best of me is yet to be explored by me itself
2. I am a Technician(I dont about the Programing Language)
3. Started a boring engineer and ended up as a Full stack Guy(I still don't know which stack i belong)
4. I just love problem statement and I am just hacking to solve all the problem statement that I find and I will make the best out of all the things that I can reach out to.
5. And a Community Guy.

What we Dwell with is a

Problem statement

# What is our biggest disease

Overthinking, Never thinking about bad guys and anything bad that can happen and we overestimate the

# Agenda for the Talk

1. What is Artificial Intelligence?
2. What is Machine learning?
3. Types of Machine Learning
4. What is data and Information?
5. Data Generation Over Globe
6. Banking and Finance Industry
7. Scope of AI ML in Banking and other financial Sectors
8. Project on the Banking and Finance Industry using the AI and ML

# What makes you intelligent?

You learn to

1. Recognize
2. Make mistakes and learn from it
3. Make sure that you learn from the learnt aspects(you can relate to some learning)
4. You sometimes go by your Gut Feelings
5. Create Perspectives and we will learn to work with it.

The image features a central robot with a metallic, segmented body and a head with a glowing, circular core. The robot is surrounded by a vast array of mathematical and scientific information:

- Mathematical Formulas:**
  - Algebra:  $ab+ac=a(b+c)$ ,  $a(\frac{b}{c})=\frac{ab}{c}$ ,  $\frac{a}{b}+\frac{c}{d}=\frac{ad+bc}{bd}$ ,  $f(x) \leq 5$ ,  $X^2-4X+5 \leq 5$ ,  $X^2-4X \leq 0$ ,  $n(B \cap C) = 22$ ,  $n(B) = 68$ ,  $n(C) = 84$ ,  $n(B \cup C) = n(B) + n(C) - n(B \cap C)$ ,  $\log_b b^x = x$ ,  $\log_b x = \frac{\log_a x}{\log_a b}$ ,  $\log_b(x^r) = r \log_b x$ ,  $\log_b(xy) = \log_b x + \log_b y$ ,  $\log_b(\frac{x}{y}) = \log_b x - \log_b y$ ,  $a^2+b^2=c^2$ ,  $a=\sqrt{c^2-b^2}$ ,  $a_n = \frac{1}{2^{n-1}}$ ,  $= \frac{1}{2^9}$ .
  - Geometry: A diagram of two intersecting lines with angles  $\theta_1$  and  $\theta_2$  and normals  $n_1$  and  $n_2$ ; a 3D cube with dimensions 20 and 6; a right-angled triangle with vertices A, B, and C; a cylinder with radius  $r$  and height  $h$ .
  - Calculus/Algebra:  $y = ax + b$ ,  $y = \frac{a}{x}$ ,  $\sin B = \frac{4\sqrt{3}}{5}$ ,  $f = \frac{R}{2}$ ,  $M = \frac{0.046765}{3.0L}$ .
- Chemical Formulas:**
  - $C_2H_4 + Ca(OH)_2 \rightarrow C_2H_5OH + CaCl_2 + H_2O$
  - $ZnS_2 + 6H_2O \rightarrow 3Zn(OH)_2 + 2SbH_3$
  - $H_2Cl_4 + Ca(OH)_2 \rightarrow 2C_2HCl_4 + CaCl_2 + 2H_2O$
  - $2H_2O \rightarrow 2H_2 + O_2$
  - $2H_2 + 3H_2 \rightleftharpoons 2NH_3$
  - $2H_2 \rightleftharpoons 2HI$
  - $O_2 \rightleftharpoons 2SO_3$
  - $C_2O + CO_2$
- Physics/Other:**
  - A diagram of a circle with a point on its circumference.
  - A diagram of a hexagonal molecular structure.
  - A diagram of a Venn diagram with three overlapping circles labeled A, B, and C.
  - A diagram of a coordinate system with axes  $x$  and  $y$ .

# What is Machine Learning?

Machine learning is the study of computer algorithms that improve automatically through experience and by the use of data. It is seen as a part of artificial intelligence.

# Data for the Features and Attributes

What is the difference between attributes and features in machine learning?

**Attribute/Feature:** An **attribute** is an aspect of an instance (e.g. temperature, humidity).

**Attributes** are often called **features in Machine Learning**. A special **attribute** is the class label that defines the class this instance belongs to (required for supervised **learning**).

26-Jul-2011

As nouns the difference between **feature** and **attribute**

is that **feature** is (label) one's structure or make-up; form, shape, bodily proportions while **attribute** is a **characteristic** or quality of a thing.

# Data Generation

I can only give some data as everything today is more of the Data Generation, as everything is a data today.

**Every things is because it is connected.**

# What is Banking Industry?

What is the banking industry?

**Banking** is an **industry** that handles cash, credit, and other financial transactions. **Banks** provide a safe place to store extra cash and credit. They offer savings accounts, certificates of deposit, and checking accounts. **Banks** use these deposits to make loans. ... **Banking** is one of the key drivers of the U.S. economy.

# Fraud Analysis

---

What skills does a fraud analyst need?

## Fraud Analyst Skills and Qualifications

- Attention to detail – perceiving small changes and things that “just don't seem right” helps detect **fraud**.
- Organization **skills** – keeping track of what is going on, handling information from various sources, and following up in a methodical manner stops **fraud** from progressing.

[More items...](#)

# Risk Analytics

- Managing **Finance**

# Game theory

The study of mathematical models of strategic interaction among rational decision-makers is known as game theory. It has applications in logic, systems science, and computer science, as well as all disciplines of social science.

# Probability

Probability is a field of mathematics concerned with numerical explanations of the likelihood of an event occurring or the truth of a statement. The probability of an occurrence is a number between 0 and 1, with 0 indicating impossibility and 1 indicating certainty, broadly speaking.

So keep these things in mind Plausibility, Possibility, Probability

# Thank you

Now it's time to have some chit chat
